

As a Global Marketing Agent (Formerly International Real Estate Specialist - I.R.E.S.), Les Twarog can show you how to market your property differently than any other real estate agent. You've heard listing presentations and what options REALTORS™ can offer you for marketing your property. These are only the basic services such as MLS, Realtor.com, open houses, etc.. In addition to those services, Les can explain to you how his services are different from others. Have you ever thought about promoting your property in other areas to bring buyers from out of province or from

another country? What this means is not through advertising, but through the Global Marketing Agent Program, which will give you an incredible exposure in the national/international markets. The idea is to partner with certified Global Marketing Agents from other MLS areas, states and /or countries, for them to enter your property in their local MLS, so as to promote your home to REALTORS™ in their area, as well as their clients, friends and family. As you know, today buyers are moving here from many different areas. In addition to promoting your home outside of our MLS area and giving your property amazing exposure, your property will be featured in the GMA Newtwork.
